

Ntando Badla

Full Stack Developer | Stellenbosch, South Africa

ntandobadla1@gmail.com | 074 614 8629 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Profile Summary

Full Stack Developer with a Diploma in ICT Application Development (graduated with distinction), currently building real-world production systems through CAPACITI. Delivered a complete commuter platform for PRASA Metrorail passengers (covering React/TypeScript frontends, Express.js REST APIs, AI-powered features, and a PostgreSQL backend) within an Agile project team. Skilled in Python, JavaScript, SQL, and Microsoft Azure Data Services, with hands-on experience in IT support, DevOps basics, and technical documentation.

Based in Stellenbosch, eager to apply technical skills and a problem-solving mindset in fast-paced technology or financial services environments where software can drive real impact.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, Java, PHP, HTML, CSS, SQL, VB.NET

Frontend: React, Tailwind CSS, TanStack Router, Figma (UI/UX design)

Backend & APIs: Node.js, Express.js, Laravel, FastAPI, REST API design & integration

Databases: PostgreSQL (Supabase), MySQL, Oracle Apex, MS SQL Server, SSRS

Cloud & DevOps: Microsoft Azure Data Services, CI/CD pipelines, GitHub, Docker basics

IT Support: Windows 11 & Ubuntu Linux, TCP/IP / DNS / DHCP, network configuration, Microsoft Office 365 & Teams

Other: Agile/Scrum collaboration, technical documentation, web scraping, process automation

Professional Experience

Full Stack Developer — PRASA Smart Connect | CAPACITI · Cape Town | Apr 2026 – Present

- Designed and built a full-stack smart commuter platform for PRASA Metrorail passengers in the Western Cape, presented to stakeholders and technical mentors.
- Built responsive interfaces using React, TypeScript, and Tailwind CSS; developed REST API backend services with Express.js and TypeScript.
- Designed and managed a PostgreSQL database via Supabase, implementing triggers, realtime updates, and automation workflows.
- Implemented an AI-powered chatbot for train schedules, service alerts, routes, and passenger assistance.
- Built digital ticketing with QR code validation, crowding prediction, and sentiment analysis on passenger feedback.
- Integrated automated timetable updates via web scraping and scheduled background processes.

- Collaborated in an Agile team through design, development, testing, and stakeholder presentation phases.

Junior IT Support Specialist | CAPACITI · Cape Town | May 2026 – Present

- Designed a complete IT infrastructure solution for a 25-user organisation, covering hardware/software inventory, network topology, and IP addressing.
- Implemented user access control, shared folder structures, cybersecurity policies, and backup strategies.
- Conducted risk assessments and incident response planning; produced professional technical documentation and troubleshooting guides.

Software Developer Intern | Codecraft · Remote | Apr 2025

- Built a Contact Management System in Java, improving data organisation and retrieval efficiency by 30%.
- Developed a Web Scraping Application using Java and JSoup to automate data collection from multiple sources, reducing manual entry time by 40%.
- Built a graphical Weather Converter Tool achieving 95% accuracy across unit conversions.
- Followed structured project documentation and coding standards under senior mentor guidance.

IT Educational Intern | NetCampus · Tygervalley, Cape Town | May 2025

- Completed certified training in Data Management & Analytics, Azure Data Services for Modern Analytics, and Microsoft 365 Copilot use cases across IT, HR, Marketing, and Finance.

Key Projects

- **VoteSphere — Secure Online Voting Platform (Aug–Sep 2025):** Led a cross-functional team to design and build a full-stack voting application from concept to deployment. Implemented secure authentication, role management, and a MySQL backend managing elections, votes, and results. Frontend built with React and Tailwind CSS; backend with Python.
- **Residence Management System (WSU Diploma Project):** Developed a team-built residence management system using Oracle Apex, handling accommodation records, student data, and administrative workflows.
- **Car Selling Website (Team Project):** Collaborated to design and develop a database-driven car listing platform, contributing to UI design and backend integration.

Education

Diploma in ICT Application Development

Walter Sisulu University · East London | Completed Dec 2024

- Graduated with distinction in Application Development
- Averaged 65% across all modules
- Served as Deputy Chairperson of the House Committee — elected by peers for 3 consecutive years, representing 200+ students

Grade 12 National Senior Certificate

Achievements & Certifications

- Graduated with Distinction in Application Development — Walter Sisulu University (2024)
- Microsoft Azure Data Services for Modern Analytics — NetCampus (2025)
- Data Management and Analytics Scenarios — NetCampus (2025)
- Microsoft 365 Copilot Use Cases — NetCampus (2025)
- Deputy Chairperson of the House Committee — elected 3 consecutive years, 200+ student body
